

How to Purchase a Lowe's Katrina Cottage

1. **SELECT YOUR PLAN:** The first step is to select a floor plan. Lowe's Katrina Cottages range in size from 544-1800 square feet, see all options currently available at [Lowe's.com/LowesKatrinaCottage](https://www.lowes.com/LowesKatrinaCottage).
2. **PERMITTING & CODES:** After selecting a floor plan, contact your local building department to check any zoning, or minimum square footage, requirements. Ask your building officials what the requirements are for filing for a permit. This is a good time to start interviewing contractors. Some building departments will require a local engineers stamp on the drawings, a local contractor should be able to help you determine permit and code requirements in your area and direct you to licensed professions if necessary.

To find a contractor, contact your local Chamber of Commerce or the local branch of the National Association of Home Builders ([NAHB.org](https://www.nahb.org)).

3. **SELECT THE PACKAGE:** Visit the Commercial Sales desk of your local Lowe's store to select the package. This will take two visits, one to make selections and get a general price, plus a follow up visit to receive final price. See the Store Locator at [Lowe's.com](https://www.lowes.com) to find a Lowe's store in your area.
4. **FINANCING:** Secure financing for the purchase of the package.
5. **PURCHASE your Lowe's Katrina Cottage & GET STARTED:** Purchase your Lowe's Katrina Cottage Materials Package, arrange your delivery schedule and start construction.
